RE: the first on your agenda Martin and Elizabeth Zelaski regarding a fence variance , I reside 2 houses down and would like to
Speak against such a precedence setting variance to install this fence past the 50 ft. required code . This fence will be used for privacy on a porch
that was built that I don't recalled being notified about . As we are unable to attend, please consider the lines of site for water view that we pay taxes for
and again this precedence setting request is not fair to tax payers.

Thank you
